THE FUTURE IS FOR

# QUANTUM

AND ENERGY THERAPIES

# QUANTUM PHYSICS

**T**his modern approach of physics emerged end of the 19th century and has changed our vision of the world. Although highly controversial at the beginning by many classical physicians, it has become today unavoidable. All mathematical references: meter, second, kelvin, mole and ampere are defined today thanks to the universal constants of quantum physics and May 20, 2019 ratified the last artefact of the newton physics: the obsolescence of the big K, our platinum reference of the kilogram. The history of weights and measures starts a new life, the big jump towards quantum physics speeds up, and the new Standard adorns the wings of the future.

## THE FATHERS OF QUANTUM PHYSICS

- The birth of quantum physics starts with **Max Karl Ludwig Planck** studies (1858-1947) who attempted to explain the phenomenon of the thermal radiation of the black hole. He assumes that exchanges within matter occur in packets and discovers that the energy can be quantified. His discovery of a constant now known as **Planck's constant h** and the concept of quanta won him the Nobel Prize for Physics in 1918. The Planck's constant defines a minute quantity of mass, the smallest measurable on earth and in the whole universe.

- **Albert Einstein** (1879-1955) resumed the works of **Max Planck** on the quanta and goes further by making the assumption of light quantification and demonstrates that light is made of packets, and that a blue light particle carries more energy than a red light particle: light becomes quantified. These light packets, that he calls "**light quanta**" will be renamed photons in 1926.

He received the Nobel Prize in 1921 for his works on the light quantification:  $E=mc^2$ , energy equals matter.

- **Nicolas Tesla (1856-1953)**, an Austro-Hungarian genius scientist, credited with more than 800 inventions, was first of all a real pioneer: as early as 1891, the prolific engineer described the universe as a kinetic system full of free energy where man could connect anywhere at any time. In 1905, he demonstrates that electric energy can be transmitted through the earth and around it by electromagnetic waves of very low frequencies around 8Hz, spreading with no loss around the earth. Ancestor of the wireless, this discovery will be confirmed only 50 years later, in 1952 by W.O. Shumann who will give his name to terrestrial magnetic fields: the Shumann resonance.

- **Georges Lakhovsky, (1870-1942)**, a Russian scientist naturalized French, is the one who applies quantum physics to health and invents the first resonance apparatus. His intuition: the cells of an individual are capable of exchanging between them, other than biochemically, via waves and demonstrates that if these waves are perturbed, the tissues around become ill. He works out a multiple resonance oscillator, enabling to treat all the body cells. His apparatus is successfully used by the greatest hospitals.

## CLOSER TO US

Amongst other scientists who contributed to the development of this new approach, we can mention:

- Professor **R. Becker**, who demonstrated in 1970 that living organisms produce a constant electric field which varies between healthy cells and sick cells. He also demonstrated that the electric current travels in the body via the acupuncture meridians.

- In 1973, **Fritz Popp** built an apparatus capable of measuring the radiating electromagnetic energy of the body cells, and demonstrated that each cell sends and resends electromagnetic waves: the bio-photons. Therapeutic technology and development of intelligent scanners by Russians to heal astronauts, since allopathic medicine is inefficient in space.

- In October 2013, **Francois Englert (1932...)** and **Peter Higgs (1929...)** are awarded the Nobel Prize for their discovery of the Higgs Boson. It will be named "God particle", the one that gives its mass to matter.

- By reintroducing the geometry at the infinitely small scale, **Nassim Haramein (1962...)** work shows that everything in the entire universe is connected, from the biggest to the smallest scale, thanks to a unified comprehension of gravity. He demonstrates that space defines matter and not matter that defines space: vacuum is not void, it's filled with energy. Relativity does not work in quantum mechanics, and for the moment it's the paradigm of physics. There is a link missing and the latter is the Graal of modern physics that would lead to another level of knowledge. It refers to the theory of unification to which many researchers have attempted (Einstein's dream), and it is Nassim Haramein's proposition.

## Edito

Science today couples with a cutting-edge technology which allows interacting with the human being, in all its aspects. We live history; quantum physics revolutionizes our thoughts and forces us to see the world differently. The basic principles to retain: everything is vibratory, there is no time scale, and there is no space scale. It is possible today to question and dialogue with the body thanks to subtle vibration that it sends.

Still misunderstood by most of us, quantum physics governs everything that happens at the heart of matter. The bio resonance and biofeedback, directly issued from this emerging science, offer infinite possibilities to optimize health and general well-being by helping our body to recover its balance.

In order to focus on all its potentialities, it seems essential for us to offer you a special issue of "ERE NOUVELLE" to give an overview on the possibilities that quantum therapies can offer. We wish this magazine axed upon technological progress to better apprehend our world today.

To illustrate our point, a new unprecedented training will be proposed in order to better understand all these phenomena, their scientific aspects and their impact on our daily life. Do not hesitate to subscribe to the newsletter of our Quantaform partner to receive this always more complete and enriching information.

[www.quantaform.com](http://www.quantaform.com)

Together we can move along further and enrich ourselves from our mutual experiences; training is always a place for meeting and privileged exchanges. This year will be the siege of studious interaction.

## FOCUS ON QUANTUM THERAPIES

A FUTURIST APPROACH OF ANCESTRAL MEDICINE

**More and more of us are turning to alternative and energetic medicines. 35% of us resort to alternative, integrative or global medicines, against only 10% 5 years ago. Among these therapies, the quantum medicine offers a fascinating field of exploration and arouses many questions. But what is exactly the quantum medicine?**

### From physics to quantum medicine

The quantum medicine advocates an energetic approach to human being. It considers that body and mind are inseparable and includes physical, emotional, psychic and spiritual dimensions. The core of this bio-energetic medicine rests on the primordial concept demonstrated by Einstein that everything is "energy". It works on the infinitely small, the quantum, and subatomic particles constituting us. In applying the laws of quantum physics via computer programs and completely new protocols for treatment, it pictures our being as a vast network of electromagnetic information. Our cells send specific frequencies that Bioresonance programs can detect, analyze and repair.

To apprehend the reality of this medicine, that we could call futurist, even virtual, we have met Claude-Jean Lapostat. This therapist has been practicing traditional Chinese medicine for 20 years and quantum therapies for the last 10 years. Set in Biot at the Bastide des Mimosas, he has just created the "International Institute of Quantum". But Claude-Jean Lapostat remains prudent in his terminology and prefers to talk about well-being, prevention, energetic rebalancing or cellular re-information.

However, in his practice, more and more people are consulting, even sometimes coming from far away to benefit from his treatments. "It's by word of mouth, the

results are here and people realize how beneficial the effects of the biofeedback can have on their health problems. This alternative solution does not pretend to replace the traditional allopathic medicine. This latter is efficient in case of emergency situation; but us, we are fitting more within the domain of prevention". How does it work? "Each tissue, either hard or soft, has a frequency; we proceed to the energy appraisal of a person with a computer program that analyzes the cells of that person on a subatomic level. The program manages over 55000 information per second, and captures the information transmitted by the brain on about 8000 points of the body for a period of 7 minutes before drawing the

veterinary care... In general, results can be obtained on the first session, but since we deal here with cellular re-information, 3 to 4 sessions are necessary in order to consolidate the effects".

## The connected medicine, it's already today

This quantum approach of the human body disrupts the paradigms of traditional medicine based on chemical design of physical mechanisms. However, during meetings organized at the Bastide des Mimosas, doctors, psychiatrists, researchers in neuroscience, surgeons and astrophysicists, come to exchange their knowledge and experience on new therapies. But when doctors decide to use these treatments, they will perform them under the banner of therapist, since quantum medicine is not yet recognized by the Council of the Order of Physicians. 40 years ago, the first scanners weren't acknowledged. Then the MRI appeared (use of magnetic resonance imaging) and today, stimulation by magnetic resonance is approached. Similarly, Chinese medicine was not taken seriously, while today, scanners reveal the response on the brain level when using acupuncture needle.

It takes pioneers to move lines. And Claude-Jean Lapostat is certainly one of them. On the strength of his several years of experience and his exploration of the various systems of quantum care, he has worked out a new process of Bioresonance and biofeedback: the QuantaScan Pro. This apparatus, made in France conjugates the best performances of Russian, German and Belgian systems adapted to professionals in order to establish health appraisals. His algorithms allow for detecting the probabilities of pathology between 1 to 15 years before the apparition of the imbalance. Clearly, the apparatus detects the warning signs of the organism malfunction and allows for the restoration of the equilibrium state and the "good" information to each organ. We have here a preventive

treatment applied by metatherapy (therapy per metha frequencies).

### What are the main evolutions and differences with the existing systems?

"QuantaScan Pro is a lot more visual than the Life system that only showed the percentage charts. However, both systems are complementary and work in synergy, quotes Claude-Jean Lapostat. The system Life is more adapted to treat the emotional field when the QuantaScan is better adapted to visualize the organs and treat them on the physical level. In Canada and in several other countries, doctors already use this system in addition to their traditional care. In Turkey, hospitals have purchased 45 Life systems but in France, it's much slower than in other countries due to certain protectionism." Claude-Jean Lapostat considers collaborating with Canadian and Belgian medical faculties to perform case studies using scanners and MIR, before, during and after Bioresonance sessions in order to validate the scientific aspect.

At the Bastide des Mimosas, Claude-Jean Lapostat has therefore founded the Quantum Institute devoted to research, training and information on connected medicine, approach technologies of innovative preventive care. Here, he hosts doctors, therapists and scientists wishing to collaborate and work on these researches. Claude-Jean Lapostat spreads the information and the fruit of his researches through conferences during conventions on the subject, at the cutting edge of medical technology.

energy appraisal. We then, according to the given indications, proceed to the rebalancing of the cells".

**Would then the cell carry within itself all the information capable of regenerating the organism?** "Yes. It's exactly that. The cell equilibrium point needs to be restored by transmitting low quantities of energy, i.e. minor doses of electromagnetic frequencies, totally harmless, without any perception of heat or electric current".

What are the pathologies you can treat and which results can be obtained? "We successfully treat stress, pains, addiction, and hormone imbalance. Even today, quantum medicine extends to numerous domains, such as esthetics, dentistry,

## Pilot Center for **QUANTUM** Prevention **BIORESONANCE AND BIOFEEDBACK**

**The Center QUANTUM AREA  
Applications, Innovations, Research  
And Experimentations welcomes you in  
an enchanting and verdant setting at  
Biot Sophia-Antipolis**

A place where researchers, doctors, naturopaths and therapists in various well-being disciplines meet to exchange and share their experiences. Sessions of energetic rebalancing have been proposed there for a few years. These innovative technics emanate from the progress on quantum physic and traditional alternative medicines: "a futurist approach of ancestral medicines", says Claude-Jean Lapostat.

The quantum therapies are based on the human body vibratory equilibrium. All cells and organs, but also all emotions vibrate on their own frequency.

This technology uses scanners able to analyze these vibrations and to detect the disharmony before sending by biofeedback the corrective vibrations so that the body can recover its equilibrium.

It takes into account all the organs and components of the human body together with the energetic flow, considering the body in its physical, emotional and psychic entirety.

At a time when medical care is more and more expensive and restrictive, the Center Quantum area focuses on prevention and well-being to detect vibratory dysfunctions up to 1 to 15 years before pathology is declared.

With this type of apparatus, we can detect our weaknesses, measure our energetic pollution and insufflate correct biological vibratory frequencies in order to restore the body homeostasis and improve health.

Today, our health capital and our environment take center stage. We are more and more concerned by the quality of air, water and diet and these vibratory technics echo back to this awakening of consciousness.

Quantum Area organizes many conferences and seminars on the subject of Bioresonance and health. It hosts practitioners of natural or holistic health and doctors anxious to open up to a more global understanding of the human functioning in order to enrich their practice through a predictive appraisal, like the traditional Chinese medicine.

# QuantaScan Pro

BIORESONANCE QUANTIQUE

*"Practice of the future"*

## **A PROVEN EFFICIENCY** **QUANTUM BIO-RESONANCE**

ANALYSIS AND IMMEDIATE REBALANCING OF THE HUMAN BODY

THE QUANTA SCAN PRO SYSTEM PERFORMS A  
NON INVASIVE VIBRATORY ANALYSIS OF THE WHOLE  
ORGANISM IN ONLY A FEW MINUTES.

MORE INFORMATION ON:  
[WWW.QUANTAFORM.COM](http://WWW.QUANTAFORM.COM)

## MULTIPLE EFFICIENCY

Bioresonance naturally finds its place in the world of Sports where its efficiency can be applied to both performances and mental preparation or else on trauma and injuries.  
A vibratory solution for all athletes who wish to excel.

### SPORTS PERFORMANCE AND RECOVERY

Quantum therapies, such as the LIFE system can improve performances, vitality and energy by boosting the organism on several levels:

- Oxygenation and stimulation of tissues and muscles to optimize the muscular response,
- Rebalancing potential lack in vitamins, amino acids and minerals,
- Regulation of the acid-base balance,
- Sleep improvement, and eventually apnea and snoring.

### MENTAL PREPARATION

Since a good emotional balance is essential in order to excel, the LIFE system proposes a whole program to overcome your fears, to transform negative energy into constructive energy, improve your concentration, silence the parasitic emotions and build a mind made of steel.

### TRAUMA AND INJURIES

The LIFE system turns out to be very effective to recover from a physical injury, it helps in particular to:

- heal
- stimulate the bone regeneration after a fracture,
- control the pain
- recover from muscle atrophy.

Non exhaustive list of most common disorders.

# QUANTUM THERAPIES AND ARTIFICIAL INTELLIGENCE

Quantaform International Center

A pioneer in innovation for the health of the future

In the age of **A.I.** (Artificial Intelligence), quantum therapies find naturally their place on the front stage.

We must live with our time and quantum physic brings us new notions: no space, nor time exist, cells are totally entangled and we are all connected. It is obvious that waves and vibrations play an essential role in our life. These innovative technologies, **scanners of Bioresonance an of Biofeedback** rest upon both ancestral therapies like the **Traditional Chinese Medicine** or the **Ayurveda Medicine** and on the progress of quantum physic that enlighten our vision on the vibratory and energetic doors of our world and of the individual. Similar to these ancient medicines, Quantum therapy considers the human body in its entirety: physical, emotional, psychic and spiritual.

It guides us to a better understanding of health and body balance where the vibration holds an essential place, reconciling tradition and future.

## The vibration, valuable information for the interpretation of imbalance.

The human body is a wide field of resonances of electromagnetic waves and scalar waves. Each tissue, cell or organ has its own vibratory frequency and its own energetic signature, relating directly to its environment.

Thanks to these technologies, it is now possible to analyze the body imbalance, to better detect the causes of dysfunction and degradation of tissues and cells. The vibration occurs at the core of the cell (mitochondria) made of light particles that we call bio-photons (string theory). To apprehend the mechanisms of vibratory imbalance in all aspects, taking into account the emotional and the

proper stress of each individual, enroll us in a preventive, relevant, precise and personalized therapy.

A very valuable prediction tool that can detect the energetic imbalance of an organ or a tissue far before it degenerates. A key advantage to preserve health capital and body homeostasis.

These technologies originally from Russian and American scientific researches have been first tested and developed for treating cosmonauts in space (allopathic treatment has no effect, even a harmful effect in weightlessness). They have improved and been updated for the use of a growing advised clientele. Popular in their early days with Eastern countries inhabitants, they progressively spread over in Europe and all occidental countries.

## How do these scanners work?

- By Bioresonance, they analyze the human body on more than 8000 items in a few minutes to detect the vibratory acute or chronic disorders.
- By biofeedback, they re-inform the tissues and organs with the relevant correct vibration, so that the body can repair itself, rebalance and reach a better wellness.

They can detect:

- Tissues and organs in energetic weakness,
- Emotions and stress harmful to our health and have perturbing energetic frequencies,
- Our lack in amino-acids, minerals and vitamins,
- Our hormonal level, etc. Some people use these vibratory scanners periodically, 2 to 3 times a year: A way to keep up with an optimal health of their body and mind, added to a proper healthy lifestyle.

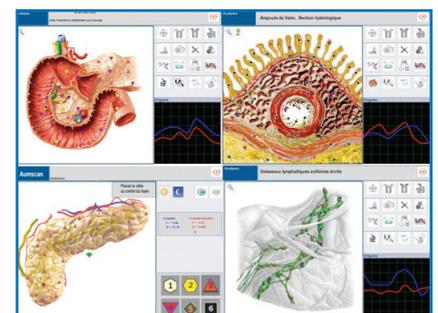

Others, with greater stress, use them on longer periods, spacing each session 21 days apart. The sessions are totally harmless and non-invasive.

## Commitment of Biot Quantum Center

In order to offer to the public a better communication on the studies of these innovative therapies, the Center in Biot organizes several conferences, workshops and training on the subject.

Claude-Jean Lapostat also travels around the European French-speaking territories, Italy, Spain, Portugal and the Maghreb, participates in many wellness salons, and organizes congress and seminars for a more and more interested and enthusiastic audience.

Thanks to his positive experiences, he is today an expert, a trainer, and an exclusive distributor of these Bioresonance and Biofeedback scanners in all these countries.

## ALTERNATIVE MEDICINE AND BIORESONANCE TAKE CARE OF OUR PETS

Alternative therapy is on the rise and is not only dedicated to human beings. Consciousness is changing and more and more pet owners turn to alternative therapy to keep their animals in optimum health.

### What kind of therapy for our friends

#### THE NATUROPATHY

Considers the organism and the individual as a whole and can give an appraisal on the life balance of the animal: diet, past, behavior. It groups different alternative medicines such as:

- **The Plant medicine** or herbal health is mainly used to prevent and ease tensions and stimulate the immune system.
- **The Aromatherapy**, more powerful, will be more efficient for more serious problems, such as main digestive problems, alopecia, itching, tendinitis and joint pains. To be used however with great care to avoid overdose.

#### THE ACUPUNCTURE

5000 years old science dedicated to restore vital energy, the "Qi", using acupuncture points and meridian: a very efficient technique to stimulate blood circulation, reduce epileptic crisis, relieve pains, anxiety, allergies and urinary infections, ...

#### THE PHYSIOTHERAPY

Uses massage, ultrasounds, hydrotherapy, electrotherapy and thermotherapy. It is better used on dogs and horses and excellent results are obtained on animals suffering from nervous system pathologies.

## THE BIORESONANCE

is based on the principle that physical, instinctive, relational, human or animal disorders are linked to energy disorders.

Each cell, each part of the body, each virus, bacteria, pollen, emits energy and has its own frequency.

Scanners analyzing these frequencies, such as the LIFE system can, by Bioresonance, detect the faulty frequencies and by Biofeedback rebalance them with harmless electromagnetic waves.

This method happens to be highly efficient on animals that have a very good receptivity to waves and become very relaxed during sessions.

Close to acupuncture, Bioresonance stimulates the meridians to restore the circulation of the energetic flow; it also allows access to RIFE tests, to iridology, for a deeper understanding of the animal imbalance.

These Bioresonance scanners will draw up a nutritional appraisal and highlight the eventual lack in vitamins, minerals and amino-acids.

According to Mathieu Ricard, Buddhist monk, animals are sensitive and aware beings, gifted with extra sensorial perception. It is time to consider them as clever beings like us and no longer like inferior individuals.

In this context, it is perfectly coherent to give them the benefit of the last technological advances, as much for their well-being as for their health.

## THE OSTEOPATHY

is based on the principle that all body systems interact. The osteopath uses his hands as a single tool.

The handling restores the energy flow and relieves pains to the source.

## THE HOMEOPATHY

Has been used for nearly 150 years on our pets and on livestock. A therapeutic method which administers very dilute doses of substances capable of provoking, at higher doses, problems close to the symptoms present in the patient. Vets use homeopathy successfully as natural alternative to antibiotics

## Horses Ultra Receptive To Connected Therapies

The study of horses in this domain is particularly interesting: they have become either pets or high level athletes, and considered as such.

The physical and mental preparation of race horses depends intimately on their rider.

Compared to other pets, they often change owners, this leads to emotional stress, such as anxiety, fear, sadness... Furthermore, the physical preparation increases the risk of injuries and increased stress level.

Bioresonance scanners, such as the LIFE system, offer a technology able to not only treat psychic trauma and disorders, but also emotional wounds.

To illustrate this, let's take the example of two mares: the eldest protected the younger still in weaning, but she suddenly started having an aggressive behavior, no longer standing her congener in the neighboring box, stamping endlessly on the dividing wall, until getting hurt. However, they could not stand to be apart without showing hysteria and anger.

The LIFE system could highlight an unhealthy jealousy between them and an auto-destructive behavior of the young mare: they had developed a fusional and destructive mother-daughter relationship. A few sessions solved peacefully these troubles and they could be separated; everything went back to normal. They live today apart and harmoniously.

# THE TELOMERASE

## THE IMMORTALITY PROTEIN?

*Telomeres, biological markers of the cellular aging*

Discovered in 1960s, the telomeres enthused many researchers' teams who highlighted the telomerase in 1985, true immortality protein. Telomeres are built during embryonic development at the ends of linear eukaryotic chromosomes: they consist of DNA sequences repeated several thousand times whose role is to protect chromosomes from progressive time and environment degradation. Their progressive shortening witnesses our cellular aging, hypothesis formulated by the Russian biologist Aleksei Olovnikov in 1971. Eventually, at each cellular division, telomeres erode until they reach a critical size, triggering a symptom of senescence of the cell. Telomeres act like a biological clock governing the lifetime of cells. This theory is known as "the telomere theory of aging". It also reveals the existence

of an enzyme capable of reversing the aging process by synthesizing new DNA telomere sequences: the telomerase, discovered by Elizabeth Blackburn and Carol Greider in 1985; they will be awarded the Nobel Prize for Medicine in 2009.

### The telomerase Could it be the youth enzyme?

According to Dr. Christopher de Jaeger, telomeres are the witness of the noxious time effect. With each cell replication, the telomeres get shorter and shorter until they are so short that the cells can no longer divide and age: senescent cells.

On a larger scale, the organism's tissues, part of these cells, witness the effect of this aging. We are not all equal in front of this cellular clock, and people aged 40/50 years old can have shorter telomeres than those aged 60/70 years old. But the cellular aging has its limits and the maximum life expectancy is estimated at 120 years. That said, there is aging and aging longer in good health, this is why the role of telomeres is so important, according to Dr. Jaeger.

### The telomerase, fountain of Youth or carcinogenic protein?

This protein can rewind the cells biological clock and offers great hope with regards to the treatment of degenerative illnesses and

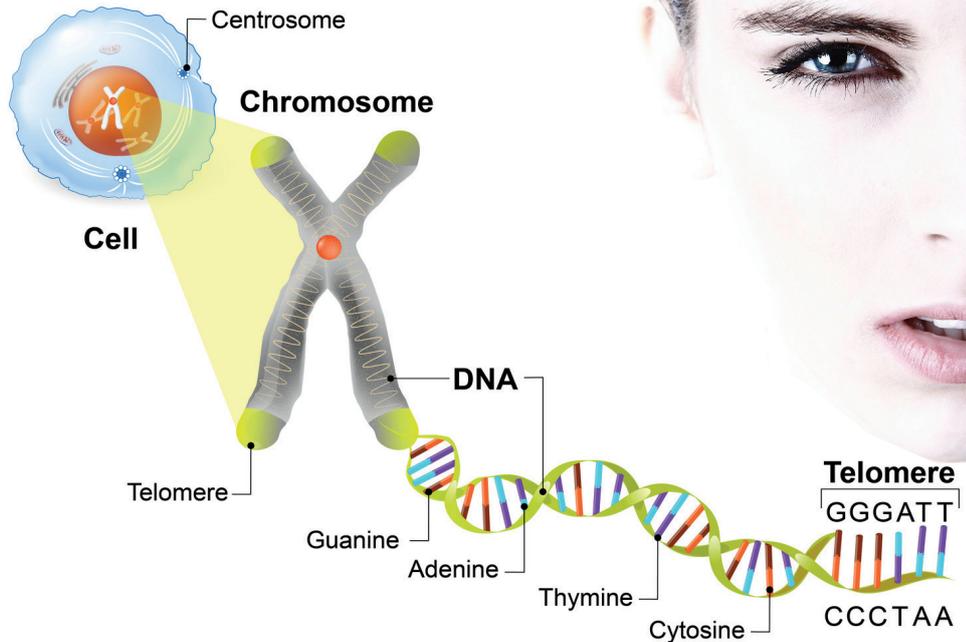

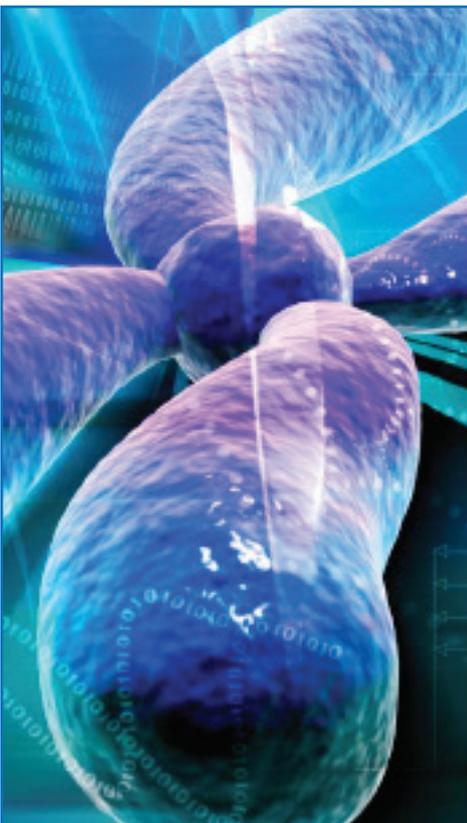

cell transplant: it would allow to extensively growing "young" cells in laboratory in the intent of a transplant, interesting technique for pancreatic cells transplant of islets of Langerhans.

However, a study directed by Professor David Beach in London in 2000, reveals that the telomerase could not only increase the lifespan of a cell, but also may present a certain level of cancer risks. What is certain is that the enthusiasm aroused by the telomerase on many researchers should eventually bring us a clear answer. But as explained by Dr. Jaeger, "everything seems" to be a question of equilibrium in the telomerase activity.

Meanwhile, the general public is interested in this fountain of Youth, as witnessed by the sale of Astragal, a plant that contains telomerase active compounds.

## Telomeres and hormones

Male sexual hormones, in particular the testosterone, encourage telomerase synthesis and an

americano-Brazilian study has highlighted in 2016 that danazol stimulates the production of this longevity protein (published in "The New England", medical journal).

DHEA, hormone essential to life, also encourages the telomerase activity and the lengthening of telomeres, but here again, equilibrium is necessary between DHEA and the active compounds of this protein.

## Scientists reverse the aging clock of adult stem cells

The Buck Institute for research on aging, in collaboration with the Georgia Institute of Technology, managed to reverse the aging process of human stem cells.

By comparing freshly isolated stem cells DNA of young donors, with artificially aged in vitro stem cells of these same donors, they demonstrate that aged cell's DNA is due to the activity of certain components of the genome: the retrotransposons.

By cancelling the accumulation of toxic transcripts of these retrotransposons, they reversed the aging process and could regress them to an earlier stage in their development.

Research continues on degenerative ailments, such as arthritis, arthrosis, osteoporosis ... To be followed ...

## To understand aging mechanisms: the cloning trail

Conflicting results were exposed when comparing the cloning of the famous sheep Dolly, whose telomere were "aged", to those of six cloned cows in 2000 using the same technique, and whose telomeres were longer than their congeners of the same age.

According to researchers, if the cellular mechanism transfers to the whole organism, it would then be possible to obtain an animal that would gain about an extra half-life.

For the moment and due to ethical and technical barriers, this perspective remains purely hypothetical.

## The bioresonance: an anti-aging must

Quantum technologies slow down the aging of telomeres. They can act directly on the telomeres and the DNA production and equilibrium, on the collagen, on the elastin ... These intelligent scanners vibrationally boost the system of cellular regeneration, helping the body to produce this anti-aging substances.

# FIELDS OF APPLICATION

# FOR WELL-BEING IN BIO RESONANCE

The fields of application register in well-being and prevention measures. The possibilities are endless and improve daily thanks to exponential technologic evolution of the LIFE system.

## Wellness for all

- Pains: dorsal, dental, etc.
- Slimming, ponderable balance
- Addictions: tobacco, drugs, alcohol, sugar ...
- Lack of vitamins, minerals and amino-acids ...
- Intolerance and food allergies: gluten, dairy products,
- Digestive, circulatory, respiratory systems,
- Hormonal regulation,
- Discomfort, depression,
- Management of emotions,
- Digestion, constipation,
- Dental loosening,
- Concentration,
- Bone traumas,
- Muscle tone, fitness...

## Children and Teenagers

- Nocturnal anguish,
- Pediatric insomnia,
- Concentration span problems
- Sleep disorder,
- Hyperactivity,
- Autistic problems,
- Communication problems,
- Enuresis,
- Juvenile arthritis,
- Articulation problems,
- Respiratory problems,
- Revitalization
- Anguish, anxiety.

## Meeting with a Doctor

*"Meetings do not happen by chance. They result from our choices and decisions. When I contacted Claude-Jean Lapostat, I did not imagine that such extraordinary consequences would arise from our conversation. One year ago, I suffered a stroke. I woke up on a hospital bed in a very poor condition, unable to walk, only with a walker. Thanks to Claude-Jean Lapostat and the quantum medicine, I am now on my feet, or at least..... who did most of the work. Physiotherapy and speech therapy helped me to perfect the result."*

*Doctor Rose-Marie Petitgenet, anesthetist and acupuncturist, testimony after a long hospital career.*

## Balance and well-being of our pets

- Emotional well-being,
- Fear, stress,
- Behavioral stability
- Aggressiveness,
- Performance,
- Articular pains,
- Cellular repair,
- Healing,
- Lack in amino-acids, minerals, vitamins ...
- Accidents, traumas...

## A profile suited for each animal

*"My horse, Attila, lost all his bearings further to an accident. In parallel to the allopathic treatments, I performed a rebalancing with the LIFE system. The effects were felt very quickly. Not only does he no longer limp, but furthermore, he has overcome an emotional milestone. Over the sessions, his eye became sharper and he has started to relate with me as well as with his congeners."*

# Bioresonance and feedback

## An energetic technique

### Against deleterious stress mechanisms

Some refer to stress as the illness of the century, next to cancer, so true that today, modern life with his race against time distances us from our deep aspirations and generates overcoming disorders.

Stress can be defined as all of an individual's responses to pressures, strains, or environmental attacks, mechanism of cascading responses which perturb the organism and can lead to different emotions and pathology.

The notion of stress has been introduced by the endocrinologist Hans Selye, who published in 1956 "The stress of Life" where he described the mechanism of adaptation syndrome, that is to say, all the modifications that allow an organism to bear the consequences of a trauma or of a natural or operative event.

We can distinguish two major center lines: an oxidative stress, of metabolic functioning, and an emotional stress linked to external attacks, which can be positive or negative.

#### The oxidative stress

Our body cells breathe, feed, die and regenerate permanently. This process is essential for energy production, thanks to our cells' mitochondria, however as all biological processes, this engenders wastes that need to be drained by the organisms: the free radicals.

The older the body gets and their elimination more difficult, the death probability does not remain constant within time but progressively increases from the age of 30.

Just living and breathing oxidize our cells and induce aging.

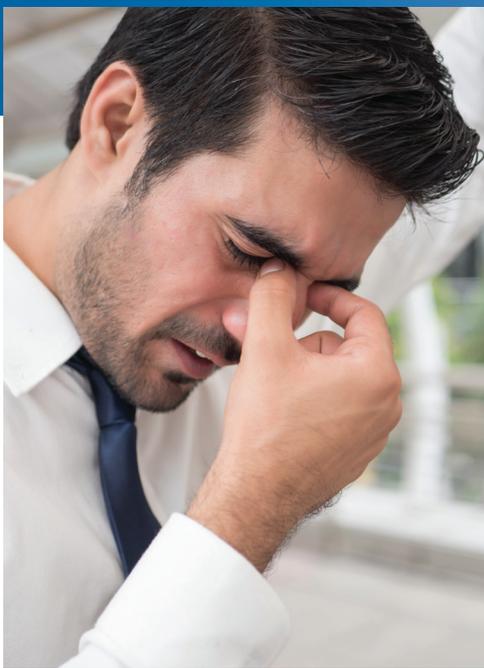

Environmental factors also play an important role in the production of free radicals, air pollution and new substances in our diet contribute to the increase of this phenomenon and provoke imbalance disorders and premature aging, deleterious for our health.

The oxidative stress becomes pathological as soon as the body protection system is overwhelmed by pollutants, internally by the mitochondria's action that produces our energy, but also by free radical via the respiratory system, diet and mucous membranes.

The oxidative stress contributes to inflammation and mutagenesis and plays a major role in several immunodeficiency syndromes.

#### The Emotional stress

Stress is a normal reaction of the body to circumstances, perceived rightly or wrongly, as a potential threat to its equilibrium. This reaction appears as a series of physiological changes that prepare the body to face this threat: adrenalin secretion, increased muscular tone, accelerated breathing and heartbeat, slowed digestive functions and mobilized

## Stress and Ego

Serge Marquis, Canadian psychiatrist and lecturer, associates modern life stress to our ego where he compares as a metaphor the thoughts in our head to a hamster continuous spin; this hamster permanently analyzes what could threaten the ego (why me, why looking at me like that, drivers quarrels, etc.); since the brain prioritizes what is perceived as dangerous, it permanently gets into a survival mode, the "fight or run" mode. The body remains mobilized with the whole procession of metabolic reactions that stress triggers; this phenomenon, lived sustainably and iterated, sets up a chronic state of tension and inflammation finally creating dysfunction and illnesses.

## Illness and Stress

### Depression:

The body can no longer compensate the effects of stress which generate acidifiers and reacts by dipping into its reserve of alkaline minerals (mainly in the bones), magnesium, calcium,

intellectual functions; it leads to the production of cortisol by the adrenal glands. The cortisol will then stimulate two areas of the brain: the cerebral cortex that will react to the stress stimulus, (escape, attack, immobilization, compensation ...) and the hippocampus that will smooth the reaction. If stress is too important or lasts, the hippocampus saturated with cortisol can no longer regulate it. The cortisol invades the brain and creates depression, digestive functions are disturbed and eventually stress will lead to exhaustion, burn-out and illnesses.

potassium, until exhausted, progressively less and less resistant as its reserves in minerals decrease; it becomes a vicious circle leading to other in chain pathologies.

### Brain damage:

Neural circuits are at the same time over-urged and undernourished, which could eventually generate irreversible disorders, such as schizophrenia and stroke.

### Degenerative diseases

such as cancer.

The immune system is overwhelmed and the body is incapable of protect itself against cancer or pathogen cells.

On a smaller scale, without willing to be alarmist, warning signs are most of the time serious illnesses, like back aches, persistent fatigue, dizziness, disturbed sleep, digestive and stomach acidity problems, weight gain or loss, the list is non-exhaustive.

## THE BIORESONANCE AND THE BIOFEEDBACK OR QUANTUM THERAPY

This therapy considers body and mind as an indivisible whole and includes physical, emotional, psychic and spiritual dimensions. Everything is energy, everything is light. The body emits and receives light and energy waves, the bio-photons.

Informational therapies, also called, quantum therapies use sound, light or electromagnetic waves, in order to perform analyzes or therapeutic treatments. They are based on technical applications linked to quantum physics.

Powerful apparatus are today, not only able to precisely and harmlessly detect weak organs or tissues, but also to reveal hidden and repressed emotions in our

cellular memories, to detect disharmony, to calm the body to help its equilibrium recovery, re-informing it by Bioresonance, hence creating a powerful mechanism of cellular repair.

Highly efficient against stress, obsessive disorders, and psychological ailments, Bioresonance and Biofeedback prevent future physical disorders, direct consequences of this stress, and therefore act somehow on causes and consequences but also calm the emotional.

Daily testimonies of efficiency pour in and more and more practitioners and doctors use these new non-invasive technologies in addition to their activity.
